
10,000 permutations; negative O-information: BH within each sample x region (35 triplets), q <= 0.05
82/82 samples available; mean count across tissues per stage
Triplet A: DNA methylation + (H3K9me3 or H3K27me3) + other
Triplet B: (H3K9me3 or H3K27me3) + other (no DNA methylation)
Triplet C: neither A nor B
